

THE ARIZONA SILVER BELT

OFFICIAL PAPER OF GILA COUNTY.

Saturday, December 19, 1891.

CHILE MUST COMPLY.

If we are to credit a late Valparaiso dispatch, after the receipt of President Harrison's message to Congress, in which he outlined the course to be pursued by the United States towards the Chilean government in regard to the murder and wounding of U. S. sailors upon the streets of Valparaiso, that government is absolutely opposed to a compliance with our demand for indemnity and apology. The President in emphatic language said, "If Chile should still decline to accede to our demand for reparation for the mobbing of our sailors, he will ask Congress (the war-making power) 'to take such action as may be required.'" What Congress will do in the premises is foreshadowed by the rapid construction of new naval vessels, the Newark, Concord, Bennington and Montonomah, completed within the present year, and twenty-four war ships, of all classes, now under construction; some of the more important vessels of that number will require about a year for their completion, at which time we can claim naval vessels not excelled by any other maritime nation. Our vessels now afloat warrant the United States in pressing upon Chile a compliance with the demand, already made, which from the present aspect of affairs is not likely to be modified.

Chile, by reason of misrule, is virtually bankrupt. In 1882 she had a population of 2,271,949, more than half of whom could neither read nor write. The area of square miles belonging to piratical Chile is 256,887, a large slice of which she took vi et armis from Bolivia and Peru. The island of Juan Fernandez, noted as the residence of Alexander Selkirk, alias Robinson Crusoe, for four years, located about three hundred and sixty miles off the coast of Chile, is a part of her possession and has now a population of about one hundred. All her forts are well fortified and she has a formidable navy, but notwithstanding her effectiveness for defense, in view of the belligerent attitude of the United States and Spain, who demand indemnity and apology for offenses committed against those powers, her fighting strength is greatly insufficient. Doubting her ability to hold those powers at arms length, it is reported she has contracted with Krupp for far-reaching guns, with a view of winging her enemies, should they approach her coast, at long range, which evidences the fact, that while whistling through the graveyard to keep her courage up she is not yet prepared to show the white feather.

While that is the case, we suggest, for Chile's consideration, that it is a valiant feat that dare eat its breakfast on the lip of a lion; and yet it seems that Chile proposes to become that indiscreet flea. When the "terrible war is over" and the United States is considering what is best to impose upon Chile as a security for the future, why not return to Bolivia and Peru the territory which that buccannery republic denuded them of? This shorn of a major part of her present possessions she would be rendered comparatively harmless. Of course we will claim a consideration of what it cost the United States to bring Chile to a sense of justice.

In thus speaking so confidently of results, we are moved to the conclusion by the energy displayed by our government in preparing for an aggressive blow. Uncle Sam, the youthful Hercules of the west, has shed his castor into the ring and it now remains to be seen whether or not Chile will comply with his demands. A late Valparaiso dispatch conveys the information that Chileans are more defiant than ever, mainly upon the belief that England and Germany will lend a hand in the protection of her principal port, Valparaiso, but in that they are mistaken, for the reason that neither of those powers will care to commit an act of belligerency against the United States which must result in a declaration of war.

"It is a trite saying, 'we never miss the water till the well goes dry,' and the same truism applies to our tardiness in the completion of the Nicaragua canal, which in the present aspect of our relations with Chile is a vivid reminder of our criminal neglect in not availing ourselves of the opportunity in time of peace, of shortening the water-way four or five thousand miles between New York and Valparaiso, where at the latter place the United States will soon have urgent business.

The transmission of power from Niagara Falls to Chicago by electricity has been proposed in connection with the World's Fair. The scheme is suggested by H. W. Leonard. The distance between Niagara Falls and Chicago is about 475 miles, or more than four times the distance between Laufen and Frankfurt-on-the-Main.

The Occoquin Sun, published at Flagstaff, says that Sunday morning (Dec. 6) the thermometer touched 14 degrees below zero, the coldest morning of the season. About four inches of snow fell Saturday.

DESERVED OFFICIAL RECOGNITION.

The Government Examination of Baking Powders—Royal Officially Reported Pure.

The reports of the Government analysts, as made public from time to time in the official reports, form useful subjects for study. A great deal of attention is devoted to the examination of baking powders, and very properly so, for they are articles of general use, and many of them being so grossly adulterated all possible information should be given to enable consumers to distinguish between the good and the bad.

A large number of these articles have been analyzed, the samples being collected from dealers in all sections. The impurities found were principally alum and lime, but unwholesome. The alum is used in place of cream of tartar because of its low cost. The lime, both tartaric and sulphate being found, was present, from the use of improperly refined cream of tartar.

The analysts found and reported the Royal Baking Powder to be pure, free from lime, alum and phosphoric acid, and of high leavening strength. A complete analysis would undoubtedly have shown no baking powder except the Royal entirely free from some of these objectionable ingredients. This, we presume, accounts for the lack of leavening power in the other powders, as sometimes complained of by the cook, and for the bitter taste found in the biscuits so frequently complained of by ourselves.

The reasons for the chemical purity of the Royal Baking Powder were recently given in the New York Times, in an interesting description of a new method for refining argols, or crude cream of tartar. It seems that it is only under this process that cream of tartar can be freed from the lime natural to it and rendered chemically pure; that the patents and plant for this cost the Royal Baking Powder Company about half a million dollars, and that they maintain exclusive control of the rights.

This official recognition of the purity and value of the Royal Baking Powder by the Government will add to the already wide popularity of that article, and deservedly so.

George H. Curry, who recently returned from the great copper camp at Jerome thinks there will be a town of at least 2,500 workers there by spring; says the roads are getting rather slippery for teams and great efforts are being made to complete the tramway before the winter snows set in. It is claimed that the tramway will be completed within thirty days, when five more stacks will be added to the smelters. The roasting heaps extend from the smelters one mile and a half in length. Five men knock down sufficient ore in the mines to keep the whole works running at present; balance of force of miners are kept busy doing development work.—Prescott Courier.

Senator Stewart, on the 10th inst. introduced a bill providing for the free coinage of gold and silver bullion. It is a copy of a bill introduced by Mr. Plumb in the last Congress on the same subject, with certain amendments. One of these is that the bullion deposited in the mints shall be coined into standard dollars only and not in part made into bars. Another amendment provides that the certificates issued in exchange for the bullion shall be of denominations of not less than \$1 nor more than \$10,000, instead of not less than \$1 nor more than \$100.

The condition of the copper market is discouraging. Lake has recently sold as low as 10.90c. and even at that figure there is little disposition shown by consumers to purchase. Iron Age states that the Calumet & Hecla have accumulated a considerable amount of copper in an effort to sustain the market and protect contracts made at 12c, and believes that when relieved of this obligation, the company will unload and the market will experience a further decline. Other brands of copper are less plentiful than Lake, but the demand is little better.

One of the worst sand storms ever experienced prevailed in the Rio Grande valley, New Mexico, on the 10th inst. At Albuquerque houses were unroofed, and several moved from their foundations, chimneys blown down, many show windows of stores blown in. The Albuquerque Citizen is authority for the statement that bricks were blown out of the corners of buildings, so violent was the wind. At Las Vegas the storm is said to have been even worse than at Albuquerque.

\$100 Reward. \$100

The readers of the SILVER BELT will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials, Address,

F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 7c.

DELINQUENT TAX PENALTY.

There seems to be a misapprehension by some as to the amount of costs accruing after delinquency. This is occasioned by the notice of the tax collector which, in accordance with the law governing said notice, mentions only the main cost of interest.

For the benefit of those who are laboring under the impression that the only cost on delinquent taxes prior to the sales in March is interest at 11 per cent. per month, we quote the new law passed March 19th 1891. "Act No. 82." * * * Against each piece of real estate, lot or parcel of land separately assessed, and on each assessment of personal property the tax on which is a lien on the real estate, for which judgment is asked at the trial, the court shall include in the judgment for taxes one and one-half per cent. per month for the time said taxes were delinquent and unpaid, as penalty for delinquency, and also for the costs of publishing that portion of said delinquent list, containing the description of the property, either real or personal, against which judgment is rendered as aforesaid, together with the costs and fees of such proceedings so far as they relate to such property. There shall be taxed as costs in such proceeding the sum of one dollar in addition to court costs, and cost of publication, upon each separate piece of property whether real or personal, described in said delinquent list.—Citizen.

The New York, launched December 2nd, is 380 feet, 61 inches in length; breadth of beam 64 feet; mean draught, 23 ft., 31 inches; displacement, 8,150 tons. Her highest speed is to be 20 knots an hour, and the sustained speed is 18.5 knots. With 1,500 tons of coal in her bunkers and stored on deck, she will be able to steam 13,000 miles at the rate of 10 miles per hour. She will have all modern appliances for offensive and defensive warfare. She is to be fitted as a flagship and will be completed with all possible dispatch and her prow turned in the direction of Valparaiso.

The Albuquerque Citizen states that at a recent conference of New Mexico and Arizona stockmen with livestock agents of the S. P., T. P., and A. T. S. P. railroads, at Deming, a proposition to reduce the rate on cattle shipments to Kansas City to \$75, and to Wyoming \$80, was favorably considered and it is believed the railroads will grant the rates asked. Unless cutters can be moved, the losses will be heavy in Southwestern Arizona and Southwestern New Mexico this winter.

An epidemic of la grippe is spreading through the Eastern States, and is responsible for a large increase of the death rate in all the large cities. Indianapolis physicians report 2,000 cases of the gripple in that city. In Cincinnati, Detroit, St. Louis, Philadelphia, New York and other large cities the reappearance of the epidemic is attributed to the return of cold weather. So far as we are informed Southern Arizona is free from it, but doubtless there are instances of running at the nose.

"He said 'there never was a good war nor a bad peace,' but we aver that a war with Chile, so far as the United States is concerned will be most fortunate in arousing our country to the necessity of creating a much needed navy, to hurry forward the completion of the Nicaragua ship canal, and to remind other nations that the United States will not brook unwarranted assault upon her citizens by foreign powers.

We learn from the La Junta, Colorado, Tri-une, that Kit Carson, junior, son of Colonel Kit Carson, the celebrated frontier scout, and guide for Fremont in his explorations previous to the Mexican war, murdered his mother-in-law and seriously, if not fatally, wounded his father-in-law, on the 10th inst., at his home in Colorado. At last accounts he had not been apprehended, but, doubtless, is now in the hands of the law and will have to suffer for his great crime.

Robert Fulton, in 1805, devised the first torpedo that we have any knowledge of, which was then considered very effective for the purpose of warfare. Since that time it has been rendered much more effective and is regarded as indispensable and greatly relied upon as a most destructive element in attack and defense.

The keel has been laid by the American Steel Barge Works, at Duluth, for the first of eight whalebacks, each of which will carry 140,000 bushels of wheat, drawing 15 feet of water. They will be 325 feet long over all, 42 feet beam, 25 feet deep, and are to be built exclusively for lake trade.

We want every mother to know that croup can be prevented. True croup never appears without a warning. The first symptom is hoarseness; then the child appears to have taken a cold or a cold may have accompanied the hoarseness from the start. After that a peculiar rough cough is developed, which is followed by the croup. The time to act is when the child first becomes hoarse; a few doses of Chamberlain's Cough Remedy will prevent the attack. Even after a rough cough has appeared this remedy may be prevented by using this remedy as directed. It has never been known to fail. Fifty cents and \$1 bottles for sale by H. C. Hitchcock.

The Democratic primaries in Louisiana have been carried by the lottery faction. The State convention will stand. Pro-lottery, 373; anti-lottery, 300.

T. A. Riordan, F. W. Simon and M. J. Riordan have incorporated as the Flagstaff Lumber Company with a capital stock of \$80,000.—Flagstaff Democrat.

As shown by the report of the officials of Mexico, its trade with the United States last year was fully \$15,000,000, while it had only \$18,000,000 trade with other countries.

The telegraphers strike on the Southern Pacific is assuming a serious aspect. It has been taken up by the Order of Railway Telegraphers, and the strike may extend to other lines.

The city of New Orleans is getting ready to pay to the heirs of Myra Clark Gaines \$900,000, the amount of the judgment obtained in the suit which she began against the city, half a century ago for \$3,000,000. The judgment has just been affirmed by the Supreme Court of the United States.

"Of course it hurts, but you must grin and bear it," is the old time consolation given to persons troubled with rheumatism. "If you will take the trouble to dampen a piece of flannel with Chamberlain's Pain Balm and bind it on over the seat of pain your rheumatism will disappear," is the modern and much more satisfactory advice. Fifty cent bottles for sale by H. C. Hitchcock.

For Over Fifty Years, AN OLD AND WELL-TRIED REMEDY.—Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for diarrhoea. Is pleasant to the taste. Sold by druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.

Something for the New Year.

The world renowned success of Hostetter's Stomach Bitters, and their continued popularity for over a third of a century as a stomachic, is scarcely more wonderful than the welcome that greets the annual appearance of Hostetter's Almanac. This valuable medical treatise is published by The Hostetter Company, Pittsburgh, Pa., under their own immediate supervision, employing 60 hands in that department. They are running about 11 months in the year on this work, and the issue of same for 1892 will be more than ten millions, printed in the English, German, French, Welsh, Norwegian, Swedish, Holland, Bohemian and Spanish languages. Refer to a copy of it for valuable and interesting reading concerning health, and numerous testimonials as to the efficacy of Hostetter's Stomach Bitters, amusement, varied information, astronomical calculations and chronological items, etc., which can be depended on for correctness. The Almanac for 1892 can be obtained free of cost, from druggists and general country dealers in all parts of the country.

PREFERRED LOCALS.

New goods, new system and new prices, at E. F. Kellner & Co.'s new store opening.

Some large size boots at a bargain, at G. S. Van Wageningen's.

E. F. Kellner & Co. are prepared to cash all good checks for their customers.

Fresh candies, the choicest, received every two weeks at the Post Office Store—35 and 40 cts. per pound.

Five thousand Key West cigars just received, at G. S. Van Wageningen's.

New invoice of choice case whisky received at G. S. Van Wageningen's.

Choice cigars, at G. S. Van Wageningen's.

WELLS' PAIN EXPELLER
Are you suffering from Rheumatism, Neuralgia, Headache, Toothache, Stomachache, Backache, or any other kind of pain? If so, use Wells' Pain Expeller. It is a pure, clean, wholesome remedy, and will relieve you of all your pains in a few minutes. It is sold by all druggists, and costs only 25 cents a bottle. For full directions, see the wrapper.

BUCHU-PAIBA
Remedy for Catarrh of the Bladder, Prostate, Uterus, Vagina, and all other mucous surfaces. It is a pure, clean, wholesome remedy, and will relieve you of all your troubles in a few days. It is sold by all druggists, and costs only 25 cents a bottle. For full directions, see the wrapper.

ROYAL BAKING POWDER
Absolutely Pure.

A crown of tartar locking powder. Highest of all in leavening strength.—Latest U. S. Government Food Report.

Reverence the establishment of the first paper on the bay of San Francisco, which we believe was the "Alta," removed from Monterey in 1819, the inhabitants of the Coast generally have been interested in the news from San Francisco. The "Alta," like many other pioneers of '49, has succumbed to the inevitable and gone over to the great majority, and, like other pioneers, has been succeeded by younger generations. The "Examiner" has taken perhaps the most prominent place in the newspaper field of this year, and its weekly edition is very generally taken by those who want an interesting and reliable paper published at "The Bay." Everyone is familiar with the Premiums offered made by Mr. Hearst, the "Examiner's" enterprising publisher, and it is only necessary to say that this year the aggregate value of the premiums—of which there are 5,000—is \$25,000, which are distributed among all the subscribers to the paper. In addition to these premiums, which range in value from 10 cents to \$100, every subscriber receives one of the four great premium pictures, which will be mailed to him in a tube direct from the "Examiner's" office as soon as the subscription is received.

"The Retreat from Moscow," by Tolstouiev.

"The Drama of the Race," by A. Wagner.

Each of these pictures is 21x27 inches, and they are elegantly reproduced in color, showing every tint and color of the great originals, either of which could not be purchased for \$100,000.

The subscription price of the "Weekly Examiner" is \$1.00, and subscriptions may be sent direct to W. R. Hearst, Publisher, San Francisco, through the Local Agents of the "Examiner" or the Postmaster.

"Women and Children First," by C. Napier Henry.

"Christ Leaving the Precinct," by Gustave Doré.

Each of these pictures is 21x27 inches, and they are elegantly reproduced in color, showing every tint and color of the great originals, either of which could not be purchased for \$100,000.

The subscription price of the "Weekly Examiner" is \$1.00, and subscriptions may be sent direct to W. R. Hearst, Publisher, San Francisco, through the Local Agents of the "Examiner" or the Postmaster.

"The Drama of the Race," by A. Wagner.
